

# Jackson & Perkins

## Hardworking J&P roses that leave you free to enjoy them

There's no easier nor more economical way to beautify a yard or open space than with J&P low maintenance roses. Take our popular Simplicity® hedge roses. They grow dense and bushy, require no fussing, and bloom abundantly **just 60 days after planting**. Grow them tall for privacy or a screen of color, or keep them trimmed low along borders or walkways. You'll find easy-growing, versatile roses like Simplicity throughout this catalog, because at Jackson & Perkins, we're always looking for new ways to give gardeners years of trouble-free, rose growing satisfaction. That's why we continue to develop easy-care roses you can effortlessly add to your yard and enjoy for a lifetime. And **unlike roses you get at discount garden centers**, ours spend 24 months maturing in our fields, so they're **easy to plant, adapt immediately to your soil, flower fast, and stand up to disease and weather**. Plus, you can shop with us at your convenience, 24 hours a day, and our friendly staff will answer your toughest gardening questions. We've been growing roses since 1872, and look at gardening from the gardener's point of view. That's why at Jackson & Perkins, we create beautiful roses that leave you free to enjoy them.

 When you see this symbol throughout the catalog, it indicates a J&P Exclusive, your assurance of top-quality garden products and custom grown plants of the highest standards, available only from J&P.

### Why J&P bareroot roses are better:

*Mature, two-year-old stock for a faster-growing, stronger plant*

*Extra-fat canes for top performance in the all-important first year*

*Loose, soil-free roots let you see the quality of your plant. Plus, they're light and easy to plant correctly in the hole*

*Average size of J&P bareroot roses: 16" to 18"*

*See page 25 for how to plant your bareroot roses*
